Find the value of x and the missing angle measure.

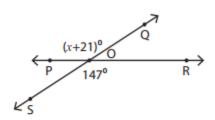

1)

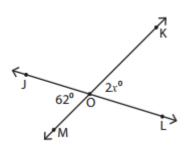

2)

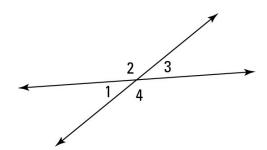

3)

4)

5) When two lines intersect, as shown in the picture below, can you find all of the missing angle measures if you know at least one angle measure? Explain how you know.

6) In the picture above, if  $m \angle 1 = 36^{\circ}$ , find the measure of angles 2, 3, and 4.
